

Engineering Candidates They did it! You can too...

BSc (Hons) Engineering Management University of Lincoln, UK

In this special feature, let's take a look at some of the impressive success study stories of the programme.

Craig Dickie, Flight Lieutenant, Royal Air Force

He joined the RAF in 1989. After completed an HNC in aeronautical engineering and other courses, he completed a University of Lincoln first-class Honours degree in engineering management. Despite not having the master's degree that is usual for the award of Chartered status, he was able to show sufficient depth of knowledge during the professional review to become a Chartered Engineer.

Ross Clarke, Flying Officer, Royal Air Force

He joined the RAF 10 years ago. After completed a HND in aerospace engineering, he joined the BSc (Hons) Engineering Management degree at the University of Lincoln. He intends to develop this into a master's degree in due course and become a Chartered Engineering.

Darren Atkinson, Support Manager, Siemens Industrial Turbomachinery Ltd

Since starting the BSc (Hons) Engineering Management degree, he has been promoted to a Support Manager of the company. He believes that this promotion came as a result of both his achievement during the time working as a manufacturing Engineer and organisational management skills he developed from study of the course. He found the course is beneficial to one's career advancement.

If you or your friends wish to achieve the BSc (Hons) Engineering Management in about one year, take action to apply for it now. **No more delay!**
